## Large Basketball System

HUGE 135cm x 80cm polycarbonate backboard with plastic protector on lower section. The system weighs 64kg - most other lower grade systems would be under 40kgs. Sprung Loaded hoop with two large springs to reduce load from the backboard - The two large springs attach the hoop to a subframe further reducing load from the backboard. - Its not designed to "hang off" however! Zinc coated chain net gives it that "street" look! Three

section main pole made from 100mm box tubing for added strength.

Powder coated exterior. Winding handle that allows all ages to move the backboard to the desired height - Its fully adjustable from 2.3m to 3.05m (full height).

Easily identifiable parts so no mistaking where they go during assembly. Large base measuring 130cms x 80cms that is able to be water filled with 160kgs of water.

Easy to attach return board that covers exposed bracing poles at the front of the system.

**BBALLSYS027 \$799.00**

Similar Systems in

Some large stores are  
Priced at over \$1399. Don't

Be fooled, this is a high  
Quality system that will  
Give years of really great

## Mizaka S27A Basketball System

\* Supasport has added another great basketball system to their substantial range – The large S27A system with box counterweight.

\* Fully adjustable with the easy – to – use winding handle, the system is fully adjustable from 2.45m to 3.05m (Full official height of 10 ft)

\* The backboard is a clear polycarbonate sheet on a metal frame and measures 136cm x 80cm

\* The bottom of the system is a metal frame and has a removable metal box designed to take any heavy objects to be used as a counterweight. – Most common would-be sandbags or similar, but bricks or anything similar would be suitable.

\* With the metal box being rear mounted requires less weight than a traditional water filled system and it has the added advantage of not freezing or leaking water resulting in a system that is substantially lighter when filled.

\* The box has carry handles and is easily removable for moving the system – Front mounted wheel make shifting the system a breeze once the system is lowered to its lowest setting.

## Large Polycarbonate Backboard with Solid Steel Hoop

The backboard has a powder-coated steel frame with a strong polycarbonate backboard and solid steel hoop with the standard tri-colour net! To complement the solid steel hoop it has a sprung load system with heavy springs that reduce the shock load on the frame and mounting brackets. The frame dimensions are 136 x 80cms and is a great size for that backyard basketball practice and games. The face of the backboard extends 32cms out from the mounting brackets. The brackets are set 50cms apart and have 3 holes on each to provide secure anchoring to your wall. The system is supplied with 6 x dynabolts for brick or block, should you be going into wood or similar then coach bolts are available from your local hardware store for around \$1 each!

## Basketball System with

This must be the best value entry system on the market! The system has a clear poly carbonate backboard mounted on a metal backing frame – how many systems can say that in this price bracket? The backboard measures 110cms x 75 cms and is designed to handle NZ's harsh UV much longer than acrylic type backboards. The system is designed to be at full height (3.05m) but can be lowered to 2.45m in 10cm increments – Please note that the pole will be visible behind the backboard when lowered due to the clear poly carbonate. For the young kids, the middle section of pole can be removed bringing the backboard down to just 1.55 m in height – just ideal for learning ball skills at an early age. The system has a water filled base with wheels at the front so that it is easy to move round.

## Supa Basketball Backboard

This poly-carbonate backboard measures 120cms x 80cms and features a sprung hoop for greater longevity. – It has a powder coated steel frame that the backboard is attached to. It has a sturdy bracket system for wall mounting, and comes complete with dynabolts for attaching to block or concrete – Should it need to be attached to wood or similar then coach bolts can be purchased from your local hardware store for around \$1 each! The sturdy mounting brackets will see the backboard sitting 37cms (approx) out from the wall, with the mounting holes for the dynabolts being 33cms (approx) vertically apart and 47cms (approx) horizontally apart. The backboard comes complete with a full size hoop (45cm) and includes a tri colour net. – It has a spring loaded system that increases the shock through the system when a ball lands on the front of the hoop and transfers through the hoop to the mounting brackets – It's NOT designed for hanging off however!

**BBALLBACK008 \$219.00**
